September 10, 2018

Mr. Diego Garcia  
U.S. Environmental Protection Agency, Region 2 NJRB  
290 Broadway  
New York, New York 10007-1866

Dear Mr. Garcia:

By this letter, we have determined that all past review comments on remedial design (RD) have been addressed to the satisfaction of the various Federal and State agencies for the Cornell Dubilier Superfund Site Operable Unit 4 (Site), Phase 1 and 2, located in South Plainfield, Middlesex County, New Jersey - EPA ID# NJD981557879. This work was performed under Inter Agency Agreement # DW96958769. The RD for Phase 1 (Capacitor Debris Area) was prepared by Arcadis under Contract No. W912DQ-15-D-3012 Task Order 0004. The RD for Phase 2 (Water line relocation) was prepared by the Louis Berger Group under Contract No. W912DQ-15-D-307, Task Order 0003. The RD is in accordance with the selected remedy identified in the Site Record of Decision (ROD) (U.S. Environmental Protection Agency [EPA] 2015) and meets the remedial action objectives.

The RD includes plans and specifications for:

- Excavation and offsite disposal of soil, sediment and debris that contain capacitors, capacitor parts, and PCB-contaminated soil and debris to an approved offsite disposal facility
- Excavation and offsite disposal of soil, sediment and debris that contain PCBs at concentrations greater than 1.0 ppm to an approved offsite disposal facility
- Relocation of 36-inch municipal water line

As a result, the Final RD can now be deemed complete. Phase IB cultural resources work, final NJDEP and local permit equivalencies and approvals identified during this RD are required for remedial activities and will be completed in the forthcoming months. Along with completion of the permits, project files and databases will be wrapped up over the forthcoming months. If you have any questions, please feel free to call me at 816-389-3364.

Respectfully,

A handwritten signature in black ink, appearing to read "Bob Pender", is positioned below the word "Respectfully,".

Bob Pender  
USACE, Kansas City District  
Superfund Program Manager
